

## A Comparison of Lancaster's Percentage of Earnings from the F.I.R.E. Sector 1969-1999

Source: Bureau of Economic Analysis

**As was the case for the U.S. and the other comparison areas, Lancaster's percentage of earnings from finance, insurance, and real estate increased from 1969-1999. However, it consistently remained below that of the nation and comparison areas.**

\*Values stop at 1999. As a result of the change in the classification system from SIC to NAICS, pre-2000 and post-2000 values for the F.I.R.E. sector are not strictly comparable.
