Selecting a video and audio source:

1. Press the SOURCES button on the Crestron screen.
2. Press your desired source (DOC CAM, LAPTOP, MAC, DVD, or VCR).
3. Once your source is selected, press SIDE SCREENS or CENTRAL SCREEN to send the video signal to the desired projectors.
4. (optional) Press the AUDIO button under the selected screen button to enable the audio from the source.
5. To display a second video source, repeat steps 1 through 4, selecting a different screen at step 3. You can display the same video source on all three screens or have two different sources.

Note: The DVD/VCR is located at the back of the room. However, a list of controls will appear on the Crestron screen, so you can control your media once you start.

Adjusting the room lights & shades:

1. To adjust the lights, press one of the five hardware buttons on the left side of the Crestron screen. The settings are the following:
   - ALL OFF
   - ALL ON
   - FLOOR LIGHTS
   - BACK LIGHTS
   - BACK & MID LIGHTS
2. To adjust the shades, press one of the two hardware buttons on the right side of the Crestron screen.

Powering down:

1. Once you are finished using the system, press the POWER button at the top of the screen. This will turn off all the projectors and bring the screens up.
