General Instructions
1. Locate the A/V box on the wall on the right side of the room.
2. Press and hold the Display ON button until the projector turns on. The projector will beep and its green light will flash as it warms up.
3. Select your Source:
   - MAC
   - HDMI
   - Laptop
   - Video
4. Control the volume by adjusting the A/V box Volume knob.
5. Press the PRESS button in the tabletop cubby to extend or to retract the cables. Always detach the cables from your laptop/HDMI device before retracting, and guide them home.

Display the Built-In Mac
1. Press the MAC source button.
2. Control the computer with the wireless keyboard and mouse, on the table.
3. Turn on the computer, if need be, by pressing its power switch at the right rear.
4. Control the volume using the A/V box Volume knob.

Display a Laptop
1. Attach your laptop to the provided VGA cable (located in the tabletop cubby).
   Attach the audio cable and/or ethernet cable if you wish.
2. Press the Laptop source button.

Play an HDMI Source
1. Attach your HDMI device to the provided HDMI cable (located in the tabletop cubby)
2. Press the HDMI source button.
3. Operate using the controls on the HDMI device.

Video Jack
1. Any device with an RCA Video and Audio L & R Out can be plugged into the Audio/Video jacks on the A/V box.
2. Press Video source.
3. Operate using the controls on the device.

Shutdown
1. Detach any laptop or HDMI device.
2. Press and hold the Display OFF button till it flashes, first green, then red, and you hear a beep from the projector. The light on the projector will turn solid red.
